You don't have to download any special program on your device to find the mistakes in an article anymore. Our spell and grammar check free online facility is available 24/7 to assist you in grabbing errors in your text. Only a strong connection to the internet is required for using this free utility. Secure Text by HTTP Protocol The HTTPS protocol of our professional grammar checker ensures that all the text you upload on this tool will be protected and secure from any intrusion. The secure version of the protocol defines that the communication between a browser and a site is encrypted, and no third party can get access to the information in any case. Briefly Explain Grammatical Faults Many online English checker tools highlight the faults in textual content without explaining the actual faults that may raise many queries in your mind, and you couldn't understand what is actually wrong with it. However, our utility not only check grammar mistakes but also explains them for your better understanding. The Ginger Grammar Checker helps you write and efficiently corrects texts. Based on the context of complete sentences, Ginger Grammar Checker uses patent-pending technology to correct grammar mistakes, spelling mistakes and misused words, with unmatched accuracy. Ginger's grammar check software improves your text just like a human reviewer would. Enjoy the most expansive online grammar checker on the market. Benefit from single click proofreading wherever you type so that you improve your English writing while you learn from your grammar mistakes. Getting your grammar right matters! In the online as well as the offline world, it is important to write without making silly grammar mistakes, English syntax errors or punctuation mistakes. We all know how communication is a key skill for success. For example, in the corporate world it is hard to get a job without good written communication skills, even if the candidate excels in his or her field. In the academic world, error-free English writing is strongly correlated with achieving better results. In the online world, bloggers need to write grammatically correct and fluent texts to make sure that the message they are trying to convey is properly reaching their audience. If you have an online service, then proper, error-free content is crucial. The bottom line is, a grammar check before you submit your writing could make the difference between success and failure. No more grammar mistakes: Check grammar with Ginger The Ginger Grammar Checker corrects a vast range of grammar use mistakes. Most grammar corrector tools claiming to perform a grammar check based on English grammar rules are not able to identify the majority of grammar errors; therefore many of these common writing errors are overlooked. Based on the context of complete sentences, Ginger Grammar Checker uses patent-pending technology to correct grammar mistakes, spelling mistakes and misused words, with unmatched accuracy. Ginger's grammar check software improves your text just like a human reviewer would. Ginger's grammar tool corrects all types of mistakes Ginger corrects all types of grammatical mistakes including topics that are not addressed by any other grammar correction program. Here are some examples: Subject verb agreement The smell of flowers bring back memories. → The smell of flowers brings back memories. Singular/Plural nouns Six people lost their life in the accident. → Six people lost their lives in the accident. Consecutive nouns Sheryl went to the tickets office → Sheryl went to the ticket office. Misused words correction Using its contextual grammar checker, Ginger recognizes the misused words in any sentence and replaces them with the correct ones. I was wandering if there's any news. → I was wondering if there's any news. Contextual spelling correction The Ginger Spell Checker is a contextual spell checker which identifies the correction that best fits the meaning of the original sentence. When combined with the Ginger Grammar Checker, you can correct entire sentences in a single click. The same misused word will have a different correction based on the context: The marble statue hed a big hed → The marble statue had a big head. Phonetic spelling mistakes are corrected even if the correct spelling is very different from the way they were originally written: I like books, exspecaley the classics → I like books, especially the classics Irregular verb conjugations are corrected as well: He flyed to Vancouver → He flew to Vancouver Ginger boosts your writing productivity Checking grammar has never been easier. Once installed on your computer, the Ginger Grammar Checker is only one click away, wherever and whenever you need it. Correct whole sentences with a single click using your current internet browser and writing, presentation-making and email programs. Correct written texts more efficiently with Ginger Rather than prompting users to correct errors one by one, Ginger identifies and corrects every error in a given sentence simultaneously; Ginger even offers suggestions for alternative sentence structures. With Ginger- you won't need to waste time trying to find the correct way to write a sentence, or have to pass your texts to someone else for review. Check your text for errors, choose the best possible corrections from the suggested ones, and learn with the help of our service. The algorithm will detect syntactic, grammatical, and stylistic errors, suggest replacement options, and explain its decision in detail. On SentenceChecker.com you can check the text of any complexity, because our databases contain a large number of rules. We have made sure that working with the text is convenient and fast for you. Here's how to use our tool... There is a field for your text on the website. You can enter your own text into it or paste it by copying it from another location. You can use keyboard shortcuts to undo and revert changes: Windows, Linux: Ctrl+Z (undo), Ctrl+Shift+Z, and Ctrl+Y (redo); macOS: Cmd+Z (undo), Cmd+Shift+Z (redo). Our site offers a large number of languages, as well as different dialects, if any. Choose the appropriate language for your text. The language selection field is located to the left above the input field. We also recommend that you take into dialect, because the rules between them often differ. Languages supported by our service: Arabic, Asturian, Belarusian, Breton, Catalan, Catalan (Valencian), Chinese, Danish, Dutch, English (Australian), English (British), English (Canadian), English (New Zealand), English (South African), English (US), Esperanto, French, Galician, German (Austria), German (Germany), German (Switzerland), Greek, Irish, Italian, Japanese, Khmer, Persian, Polish, Portuguese (Angola), Portuguese(Brazil), Portuguese (Mozambique), Portuguese (Portugal), Romanian, Russian, Slovak, Slovenian, Spanish, Swedish, Tagalog, Tamil, Ukrainian. Click on the «Check text» button on the right under the input field, this action will start the algorithm. The text will be sent to our server, where the algorithm will check it for errors and return the result. We do not store your text on our servers. During the verification process, the input field becomes unavailable. After the server returns the result, the service will select the sections of text where the algorithm detected some issue. Now you can proceed to correction. Information about the errors is displayed to the right above the input field. You can click on any of the items and start correcting errors of this category, or click on the highlighted areas in the text and follow them. When you see the text «No mistakes were found» instead of the number of errors, it means that the text is checked and contains no errors. If «Check text to get stats» is displayed instead, then you need to perform an additional check by clicking on the «Check text» button. In some cases, the algorithm does not provide options for replacing errors, but offers to ignore them. This is due to the type of error or unfamiliar situations. Usually, this does not happen. If you think that everything is correct, then you can ignore the error. Ignoring the error means excluding this rule from the list for text checkup. This error will not be detected throughout the text and it will not be brought to your attention later in the course of work. This feature is necessary when you want to leave the writing as it is and do not want to be distracted by it in the future.
